Shyam Tala, Full-Stack JavaScript Developer

Internships

Intern at iNeuron.ai, Remote

July 2022 — March 2023

This is a JavaScript job-ready Bootcamp where i have done 20+ Project using **HTML**, **CSS**, **Tailwind CSS**, **JavaScript** and also i am going to take an internship with Developing more that 20 small and large project including (**MERN**) stack development.

Education

Diploma, Computer Engineering, Atmiya Institute of Technology and Science (GTU), Rajkot

April 2018 — August 2021

9.85 CGPA

Projects

1. DailyNewsApp

DailyNewsApp is an online platform that aggregates and serves the latest news from various sources using the News API service. The main technologies used in this project are:

- Frontend: **React JS**
- Styling: **Tailwind CSS**
- Routing: **React Router DOM**
- API: **News API**

The platform displays a clean and simple interface that allows users to easily browse and read news articles organized by topic and source. Users can also apply filters like category to narrow down their search.

Source Code :- https://github.com/shyamtala003/DailyNewsApp

2. Developer Portfolio

This web app was built using React JS, a popular JavaScript library for building user interfaces. React allows me to create reusable UI components that can be easily composed and updated as needed.

The site includes several pages that showcase my skills and work:

- **Home**: The landing page of the site, which includes an introduction about me and links to other pages.
- **Blogs**: A page with links to some of my blog posts about web development topics.
- **Projects**: A page that showcases some of my previous projects, with descriptions, screenshots, and links to live demos and source code.

The main technologies used in this project are:

- Frontend: **ReactJs**
- Styling: **CSS**
- Routing: **React Router DOM**

- Backend: **NodeJs**
- Framework: **ExpressJs, Mongoose**
- Database: **MongoDB**
- Deployment: **Netlify,Render**

3.responsive home page clones of Paytm.com, Shopify.in, and Rode.com using Tailwind CSS

For this project, I designed fully responsive home page clones of three popular websites: Paytm, Shopify, and Rode.com. I used Tailwind CSS(Flowbite), a utility-first CSS framework, to style the pages and ensure they are optimized for different screen sizes and devices.

Once the pages were completed, I deployed them to Netlify, a cloud computing platform that allows for easy hosting and continuous deployment.

"All of my projects are available on my personal developer portfolio website, which can be found at https://shyamtala.netlify.app/projects**."**

Skills		
HTML5	**CSS3**	
CSS Framworks(Tailwind Css, Bootstrap)	**JavaScript**	
ReactJs	**Express.js**	
MongoDB	**Git**	

Portfolio		
Portfolio Website	**Blogs**	
Github		

Languages		
Gujarati Native speaker	**Hindi** Highly proficient	
English Good working knowledge		

Declaration

I consider myself familiar with Computer Engineering Aspects. I am also confident of my ability to work in a team. I hereby declare that the information furnished above is true to the best of my knowledge.
